Nguyen Doan Hieu

Backend Developer

0384 617 767 ndh.sunday@gmail.com Tien Duong, Dong Anh, Ha Noi

OBJECTIVE

Backend Developer with hands-on experience in building RESTful APIs and optimizing database performance. Proven ability to handle system integration and complex business logic. Looking for a professional environment to deliver robust backend solutions while expanding skills in Cloud infrastructure and DevOps practices, aiming for a long-term career as a Solution Architect.

WORK EXPERIENCE

FPT Sofware 09/2024 - 07/2025

Fullstack Developer Intern

- Participated in the maintenance and enhancement phase of a large-scale enterprise application
- Backend Focus (Django/PostgreSQL): Developed new business features and optimized existing APIs to ensure system stability. Analyzed and fixed critical logic errors in the backend service.
- Frontend Integration (Angular): Responsible for connecting Backend APIs with the client-side, ensuring accurate data rendering and handling seamless integration flows.
- Collaborated with the team to debug issues across the full stack and strictly followed Agile/Scrum workflows.

EDUCATION

FPT University 09/2022 - 12/2025

Software Engineering

GPA: 3.5

CERTIFICATIONS

IELTS 5.5 2022

SKILLS

Programming Languages	Java (Core), TypeScript, Python, Go (Basic/Learning)
Backend Development:	Spring Boot, NestJS, FastAPI, RESTful APIs
Database	PostgresSQL, MongoDB
Infrastructure:	Docker, Gitlab CICD, Gitlab Runner, Linux (Ubuntu), Git (Gitlab/Github), AWS (Learning)
Frontend Integration:	Experienced in integrating APIs with Angular, React (Nextjs) and Vuejs. Capable of handling client-side state management and data binding.

PROJECTS

FUACS - FU Attendance Checking Smart 09/2025 - 12/2025

Role: Full-stack Developer

Name of customer: Lecturer at FPT University.
Team size: 5
Technology description:

- Frontend: Next.js 15, TypeScript, TanStack Query, shadcn/ui.
- Backend: Spring Boot 3, Spring Security OAuth2, PostgreSQL, Flyway.
- AI Service: Python FastAPI, InsightFace (buffalo_l), ONNX Runtime with GPU acceleration.

Key Achievements:

- System Architecture: Designed a decoupled architecture separating Business Logic from AI Inference. This approach ensured independent scaling and prevented heavy AI tasks from blocking core user operations.
- Performance Optimization: Integrated InsightFace (ONNX Runtime) with GPU acceleration, optimizing API communication to achieve ~95% accuracy with <500ms latency per recognition request.
- Security & Deployment: Implemented Spring Security OAuth2 with Role-Based Access Control (RBAC) for secure resource management. Containerized services using Docker for consistent deployment environments.
